

Danish type metallic feeder of wet feeding with plastic hopper for pigs from 6 kg to the final fattening stage; to install between two pens or in the middle of one, recommended up to 50 pigs.

Features

- The feeder is a robust product, manufactured entirely with materials of high resistance and quality.
- The design and materials have been designed to withstand the toughest environmental conditions and last for a long life.
- Available in model wean to finish with stainless steel tray for the whole fattening cycle.
- Equipped with 23 adjustable positions, including the one with total closure to avoid the decline of the food

Benefits

- The unique design of this hopper offers various possibilities of feeding on a single pan, as required by the pig; either dry or wet feeding. Provided with an 80 kg tank with easy refill that works manually and automatically.
- The feeder provides clean water in the same hopper through two nipples, avoiding the installation of additional drinkers in the pen.
