

Dutch type plastic feeder of wet feeding for pigs from 20 kg to the final fattening stage, recommended up to 15 pigs.

Features

- The feeder is a robust product, manufactured entirely with materials of high resistance and quality.
- The design and materials have been designed to withstand the toughest environmental conditions and last for a long life.
- Equipped with 10 adjustable positions, including the one with total closure to avoid the decline of the food.
- Capacity of 30 kg.

Benefits

- The hopper provides food 24 hours, which increases the stability of the litter and avoids the tension, reducing the stress.
- Provides the best development and hygiene.
- The feeder provides clean water in the same hopper through a nipple, increasing the digestibility of the food.
