

REFLECTOR HILUX® OPAQUE

It is a reflector of solid, non-translucent walls of 46° inclination, specially designed for the poultry industry, with the purpose of concentrating the light at the floor level by tripling the luxes in the zenith, an extremely important factor during the life of the bird.

Features

- Manufactured with 100% virgin plastic and additives that provides high resistance and durability.
- Solid walls that keep the light away.
- Injected with “UVA and UVB” protectors, ant flame retardants and several additives.
- Inclination angle of the wall: 46°
- To be used with fluorescent bulbs.
- Measures: Height 14 cm x diameter 30 cm.
- Weight: 250 grams.

Benefits

- To be used on any type of bird.
- Potentializes 2.5 times the light, preventing the light from going to the ceiling and walls.
- The bird receives a greater light stimulus that increases food consumption and increases its activity in general.
- Reduces the number of bulbs installed in the farm.
- Does not burn itself.
- Easy washing and disinfection.
