

FIBERGLASS SILOS

Fiberglass structure for food and additive storage.

Features

- 780 mm diameter cover with ground pulley opening system for comfortable loading with augers, or possibility of pneumatic loading through one leg.
- It has access stairs, for inspection from above with safety cages and vertical window to distinguish the food level.
- It has a breathing tube integrated in one or two legs to ensure good ventilation inside the silo and keep food fresher.
- It has a deeper cone angle of 67° that guarantees a better exit of the food from the silo.
- Available up to 45 tons.

Benefits

- Insulation and thermal stability.
- Corrosion resistant.
- Less loss of food.
- Light weight.
- Easy loading and shipping.

For storage of:

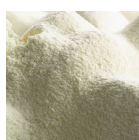

Corn

Feed

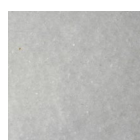

Pellet

Milk Powder

Carbonate

Salts

Fertilizer

Wood Pellets
