

SWING MATE

It is a versatile oscillating type of Feed Dispenser for technified broiler farms, in order to control the feed output at different floor levels: 1st. to supply the feed at the level of the tube to fill the TURBOGROW line baby chick feeders and 2nd. to supply the feed at floor level by using extension tubes to deposit the feed in plastic trays or paper mats. SWING MATE installs on tubes with rib or smooth tubes right in the middle between automatic pans of any brand.

Features

- Made with 100% virgin plastic and UVa and UVb additives, which give it high resistance and durability.
- It consists of three pieces; Two side pieces that are assembled and a swinging barrel.
- The oscillating barrel can have two versions: Long discharge tube (9.0cm) and Short discharge tube (6.5cm).
- In addition, 1" wide PVC extension tubes with different sizes can be used with SWING MATE: 8cm, 11cm and 15cm, in order to supply feed at the floor level either to plastic trays or paper mats. The height of the feed above the floor will depend on the needs of each poultry farmer.
- It is recommended to accompany standard automatic pans between 19cm-22cm or tall automatic pans between 23cm and 26cm. the distance is from the floor to the lower part of the tube.

Recommendations

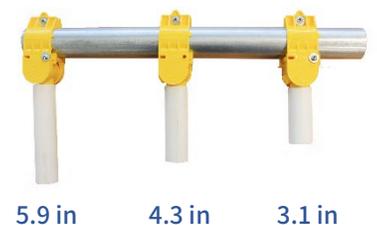

- SWING MATE short to TURBOGROW®.
- SWING MATE long to TURBOGROW 2® and TURBOGROW 2 PLUS®.

Benefits

- Automates the filling of the baby chick feeders "TURBOGROW LINE" and / or tray or paper mat.
- No longer required people to manually fill chick feeders.
- Avoid feed waste.
- Functional for all types of metal tube: smooth or with rib.
- Easy installation and handling.
- Quick washing and disinfection.
