

Second generation plastic baby chick feeder for receiving baby chicks during its first 14 days of age.

## Features

- Manufactured with 100% virgin plastic and additives that provides a high resistance and durability.
- Conical-cylindrical hopper with 6 feed distribution windows and a "W" shaped pan.
- Recommended density of 1 TURBOGROW® for every 50 to 100 chicks.
- Thanks to its design, the stowed is quick and easy, occupying a minimum space.
- Capacity of 11 lb.

## Benefits

- Greater live weight gain during the first week and at the end of the flock.
- Improve uniformity 15%.
- Decrease in feed conversion.
- Decrease Mortality.
- Easy to wash and disinfect.
- Quick return on investment "ROI".
