

# PLASTIC SLATS TITANIUM

European technology maximum resistance

Reinforced plastic floor, with rectangular perforations to be used in farrowing pens and nursery areas.

## BENEFITS

- Maximum comfort for pigs
- Allows free flow-through of droppings.
- Design allows easy assembly and dismantling.
- Quick washing and disinfection.

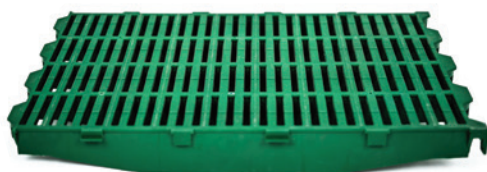

## FEATURES

- Heat conduction and retention for long periods
- Texturized surface and anti-slippage plates, to avoid falls and lesions
- High resistance, flexion, and durability for heavy use
- 50% perforated surface
- Two support area versions: Wavy-shaped assembly (TITANIUM I) and trapezoidal-shaped assembly (TITANIUM II)
